INDEPENDENT AUDITOR'S REPORT ON REVIEW OF INTERIM CONDENSED FINANCIAL STATEMENTS**TO THE SHAREHOLDERS****SAUDI ARABIAN REFINERIES COMPANY
(A SAUDI JOINT STOCK COMPANY)
JEDDAH - SAUDI ARABIA****Introduction**

We have reviewed the interim condensed statement of financial position of Saudi Arabian Refineries Company – Saudi Joint Stock Company - ("the Company") as at June 30, 2021, the interim condensed statements of profit or loss and other comprehensive income for the three and six-month periods ending on June 30, 2021, the condensed interim changes in shareholders' equity and the condensed interim cash flows for the six months period then ended, and summary of significant accounting policies, and the notes (1) to (21) which considered an integral part of these interim condensed financial statements.

Management is responsible for the preparation and presentation of these interim condensed financial statements in accordance with the International Accounting Standard No. 34 ("IAS 34") "Interim Financial Reporting". Our responsibility is to express a conclusion on these condensed interim financial statements based on our review.

Scope of review

We conducted our review in accordance with the International Standard on Review Engagements 2410 "Review of Interim Financial Statements Information Performed by the Independent Auditor of the Entity" endorsed in the Kingdom of Saudi Arabia. The review of the interim condensed financial statements includes mainly to make inquiries to those responsible for financial and accounting matters, and to apply analytical procedures and other review procedures. The review is much less in scope than the audit carried out in accordance with the international standards on auditing that approved in the Kingdom of Saudi Arabia. Therefore, we were unable to confirm and to be aware of all significant findings that we identify during our audit operations. Accordingly, we do not express any opinion on auditing.

Basis for qualified conclusion

We were unable to verify the amount of fines, delays and fees that may result from the company default to pay the bank guarantee on behalf of the associate, amounting to SR 5,1 million, as stated in Note (10), therefore, we were unable to determine the adjustments and material effects that may result from it on the financial statements of the company.

Qualified conclusion

Based on our review, except for the matters disclosed in the basis for qualified conclusion, nothing has come to our attention that causes us to believe that the accompanying interim condensed financial statements are not prepared, in all material respects, in accordance with IAS 34 "Interim Financial Reporting" endorsed in the Kingdom of Saudi Arabia.

INDEPENDENT AUDITOR'S REPORT ON REVIEW OF INTERIM CONDENSED FINANCIAL STATEMENTS**TO THE SHAREHOLDERS****A SAUDI ARABIAN REFINERIES COMPANY
(A SAUDI JOINT STOCK COMPANY)
JEDDAH - SAUDI ARABIA****Emphasis of matter**

As stated in note (19) to the interim condensed financial statements, in respect of the fiftieth ordinary general assembly of the shareholders of the company dated April 21, 2021 (corresponding to Ramadan 9, 1442 H), the following decisions have been taken:

- Non-approval of the Board of Directors report and the financial statements for the financial year ended December 31, 2020 and the auditor's report, as well as not exonerating the Board of Directors' members from liability for the year 2020.

The company's management believes that there is no need for a new ordinary general assembly to be held for shareholders because the reason for non-approval was due to the fact that the percentage of voting in the general assembly was the majority for those abstaining from voting. Our opinion has not been modified accordingly.

18. Financial risk management...(Continued)

Foreign exchange rate risk

Foreign exchange rate risk arises from changes and fluctuations in the value of financial instruments as a result of changes in foreign exchange rates.

The company did not carry out any transactions of materiality in currencies other than the Saudi Riyal, the US dollar, Since the Saudi Riyal exchange rate is pegged with the US dollar, and it does not represent significant currency risks. The company's management monitors the currency exchange rates and believes that foreign exchange rate risk is not material.

Share price risk

The company is exposed to market price risks on its investments in traded shares arising from uncertainties surrounding the future value of traded shares, Reports on investment in traded shares are reported to the senior management on a regular basis.

Credit risk

Credit risk is the risk that one party in a financial instrument will fail to fulfill an obligation and causes the company to incur a financial loss, The Company's financial instruments that are subject to credit risk are primarily including of cash and cash equivalents, receivables and other current assets. The company monitors credit risk related to receivable and related party balances and establishes provision for doubtful balances, The company deposits its funds in banks with high reliability and creditworthiness, The company also has a policy regarding the amount of funds deposited in each bank, and the management does not expect the existence of significant credit risks resulting from this.

Liquidity risk

Liquidity risk is the risk that the company will encounter difficulties in obtaining the necessary finance to meet obligations related to financial instruments, Liquidity risk may arise when the inability to sell a financial asset quickly at a value approximate to its fair value. Liquidity risk is managed through regular monitoring of the adequacy of the available liquidity to meet the financial obligations of the company. As the company has sufficient liquidity to pay its liabilities and for the liabilities owed by the company for more than a year, such as exchange for a bank guarantee for one of the local banks as the guarantor of the associate company, and it will be paid after end of the liquidation of the associate.

Capital risk management

For the purpose of managing the company's capital risk, the company's capital structure consists of shareholders' equity (consist of share capital, statutory reserve, retained earnings and equity instruments valuation reserve at FVOCI). The main objective of capital management is to maximize shareholders' equity.

The company manages and adjusts its share capital structure in view of changes in economic conditions and financial commitment requirements, In order to maintain or adjust the share capital structure, the company may adjust dividends to shareholders or issue new shares.

The company has no capital structure with specific objectives or rates to be achieved in connection with managing capital risk. The overall strategy of the company remains unchanged from the previous year.

Fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As such, differences may arise between the carrying amounts and fair value estimates. The definition of fair value is based on the measurement to the market and the assumptions used by market participants.
